An Evolution in Sustainability

Swarovski ReCreated™ Crystals

Swarovski ReCreated™ crystals are Swarovski's most sustainable crystals to date. Made with crystal glass breakage from our manufacturing process, this procedure allows us to reduce the crystals' environmental footprint by at least 34%**.

Swarovski ReCreated™
Crystals Movie

Swarovski ReCreated™ Crystals

The innovation with Swarovski ReCreated™ crystals is our ability to use breakage of crystals from the manufacturing process, and instead of it going to waste, we create new crystals, in new colors, that are of the same quality as our standard Swarovski crystals. We therefore adopt a circular approach where waste is being reused instead of thrown out.

* "Natural resources", more specifically "resource use/depletion (minerals and metals)" is one of the 16 environmental indicators of the ISO compliant crystal glass LCA. This indicator has the highest impact (of the 16), as we replace virgin raw material with (secondary) glass breakage.

Swarovski ReCreated™ crystals use existing materials that would otherwise go to waste, therefore reducing our use of natural resources and mitigating our waste. This innovation allows Swarovski to use at least 40% less natural resources* than standard Swarovski crystals, reducing these crystals' environmental footprint by at least 34%.** Based on these facts, Swarovski ReCreated™ crystals are Swarovski's most sustainable crystals to date.

** Calculations are based on ISO compliant crystal glass LCA. Calculation compares crystal glass of 100% raw material with crystal glass of 50% glass breakage/50% raw material. LCA is cradle to gate (factory gate, no distribution). The minimum glass breakage is 50%. This leads to the (minimum) 34% lower environmental footprint. The environmental footprint takes into account all 16 environmental indicators of the ISO14040.

General Warning

Loose crystals may present a small parts hazard to young children, particularly children under three years old. Depending on the size of the crystal and any attached material (such as glue, fabric, etc.), children may choke on, inhale, swallow, or insert the crystal into their noses. Magnetic products with crystal applications pose a particular risk of serious intestinal injury if ingested. The application techniques as stated in the Application Manual do not guarantee that crystals will not come loose or chip. For each application, the manufacturer must determine whether the product meets the relevant requirements related to small parts hazards and assess any risk it may pose, in particular to small children. Failure to follow Swarovski's care instructions may result in damage to the crystal, which could pose a risk of laceration or other harm.

Warning for Tableware

Application of loose crystals to tableware presents a potential risk of aspiration, choking, swallowing, or tooth damage should crystals become loose. To reduce this risk, crystals should never be applied to any tableware surface likely to come in contact with food or the mouth, and crystals should never be placed on any tableware intended for use by children. Tableware with crystals intended for decorative use only should be marked as such. To avoid dishwasher damage, tableware decorated with crystals should be washed by hand. The application techniques or suggestions in this manual do not guarantee that crystals will not come loose. For each application, the manufacturer must determine whether the product meets relevant requirements related to small parts hazards or use in food contact items and assess any risk it may pose to users. The use of crystals (which may contain restricted substances deemed hazardous under local laws) and adhesives on tableware is subject to legal restrictions in specific countries. The customer is fully responsible for complying with these country-specific provisions and shall defend, indemnify, and hold Swarovski harmless from any and all third-party claims based on product liability or otherwise relating to uses of Swarovski products and waives all its own claims against Swarovski.

Notice for Application on Packaging

The use of crystal that may contain substances like lead, cadmium or hexavalent chromium, on packaging is subject to legal restrictions in specific countries including but not limited in regard to the total content of substances based on the proportion between crystal mass to the remaining weight of packaging. The customer is fully responsible for complying with these country-specific provisions and to pass on this information to his customers.

Care Instructions

Failure to follow Swarovski's care instruction may result in damage to the Swarovski product, which could pose a risk of laceration or other harm. Please be informed that all conventional laundering processes (household washing machine as well as professional dry-cleaning) have a considerable mechanical influence onto the garment, which is based on the rotation of the washing drum. The essential requirement for a safety laundering process is that the Swarovski products are proper applied without restrictions regarding the adherence of the Swarovski products. The bigger the size of the used Swarovski product is and the more Swarovski products are applied next to each other, the more a risk of damage has to be taken into consideration. Swarovski products are made of or incorporate crystal and therefore must be handled with due care! Generally, to best protect the Swarovski products from breaking we recommend the use of a soft washing bag and to fill up the washing drum. Turning inside out before washing and selection of a gentle washing program, plus the use of mild detergents are important prerequisites to safeguard the quality of our Swarovski products. Our care instructions based on DIN EN ISO 3758 list up all Swarovski product groups as overview so that each used Swarovski product still needs to be judged in terms of its cleaning suitability for the intended purpose and finished product by the customer. Swarovski's recommendations are given according to the current state of our knowledge and Swarovski's determination of the qualification as textile application product. The customer is therefore fully responsible to determine the cleaning process applicable to the finished product, taking the Swarovski care instructions as well as those of third party materials into account. The variety of shape, cut, surface effect, size and application weight respectively amount of used Swarovski products are decisive for the determination of the suitable cleaning process. To be entirely safe customers respectively dry-cleaners usually take off Sew-on Stones, Buttons, etc. of bigger size before cleaning and re-apply them afterwards.

Unsuitable Applications

Crystals from Swarovski are intended for use in the fields of fashion, jewelry, accessories, textile products, and for interior décor. Due to their physical properties, crystals from Swarovski are unsuitable for other uses (e.g. gluing onto teeth, using crystals on or near mucous membranes, and other unsafe uses). The customer shall defend, indemnify and hold Swarovski harmless from any and all third-party claims based on product liability or otherwise relating to uses of Swarovski products purchased by the customer, and waives all its own claims.

Responsibility of User

Any oral, written, or test-based advice that Swarovski provides regarding techniques for application of its products are recommendations based on Swarovski's current knowledge and the information provided by its suppliers. Such advice does not discharge the customer from carrying out its own tests of techniques it proposes to use and their suitability for the intended application. The application, use, and processing of these techniques and products are solely the user's responsibility.

Change of Product

Swarovski reserves the right to modify the dimensions, shape, composition and concentration of components belonging to products that are referred to in this Product Information brochure. Furthermore, any applicable laws and regulations mentioned are subject to change, which is why Swarovski regularly publishes an updated version of the Product Information brochure containing facts, (application) instructions, and the current legal situation that is valid at the time of publication. References to compliance with such regulations as are stated above are based on their requirements as of the current date. Anyone seeking an in-depth understanding of the provisions should read the various laws in their entirety and/or seek advice from a legal counsel. The customer must request and observe the valid version of the Product Information brochure before (re)ordering and using the products.

EXCELLENCE, THROUGH INNOVATION AND ORIGIN

**X-Cut**

Advanced optical measurement and high-precision manufacturing deliver premium cuts characterized by unmatched brilliance.

**Hotfix Glue**

The variable temperatures at which Hotfix glue can be activated enable the application of crystals on a broad range of textiles.

**Platinum* Pro**

With its new advanced foiling technique, Swarovski has set a new standard in the lifespan of crystals.

**Crystals – Made in Austria**

The combination of innovation with sustainability and respect for individual wellbeing means that quality is always assured.

PREMIUM, BY SERVICE AND DESIGN

**Design Service**

Throughout its global network of Design Centers, Swarovski offers exceptional service provided by the industry's best creative talent.

**Global Service**

Swarovski's Global Service Network provides customers with dedicated personal assistance on a local level.

**Application Service**

A comprehensive range of application services means customers benefit from the extensive experience of leading international experts, as well as internal specialists.

**Customized Service**

Choose new variations by going beyond Swarovski's tremendous standard assortment of crystal components and forward integrated elements.

COMPLIANCE, WITH INTEGRITY

**Advanced Crystal**

Swarovski's patented lead-free** formula has changed the DNA of crystal while still offering the same sparkle, dependability, and variety for which Swarovski is famous.

**Clear**

Regular legal monitoring of chemical requirements and reasonable testing provide customers with the comfort of trust in Swarovski's products.

**OEKO-TEX**

Oeko-Tex® Standard 100 Class II (direct contact with skin) certification creates confidence in chemical safety of textile applications.

**Compliance Service**

Assessments regarding substance limitations as well as compliance information and advice to support customers in complying with relevant laws, regulations, and voluntary standards.

* Silver mirror coated with a platinum-colored protective layer. ** Crystal glass and all other materials containing 0.004 % lead or less.
